

CLASSIC DESIGN

FALL 2009

Classic Design Is New Again...

And it's fresh and far from fussy. The latest trends in gifts and home décor show that we continue to seek ways to escape the daily stresses in our lives. With the approaching change of seasons and the children back to school we look forward to a change in our home décor as well.

Decorating our homes is an extension of our personalities. And I feel decorating with color is the best way to generate maximum impact with a minimum investment of time and money. You can go big—like painting large surfaces in brilliant hues, or small—like introducing an accent color to simply freshen up the space. Either way, adding color is the quickest way to instantly transform

any room in your home. And that splash of color can be easily added with a lovely floral design.

We look forward to sharing new ideas with you this fall at our annual HOLIDAY OPEN HOUSE. It will truly be a celebration this year. We hope you can join us.

All my best,
Stacey

HOLIDAY OPEN HOUSE

Saturday

November 7th

10am to 2pm

Creativity Is Our Passion

Designing starts with the fresh like materials we desire to work with. From here, our ideas and passion take form and come to life. Whether you have an appreciation for contemporary, traditional or vintage, we take pride in creating all these stylish designs.

Christmas Spirit 2009

Christmas' traditional red captures the spotlight for 2009, it avoids sharing the stage with other traditional hues. **Red-on-red** is HUGE; all tints, tones and shades. We call it the "riot of red" and its prominence will influence other colors as well.

Nature is a muse this holiday season, expressing herself in an "echochic" palette of organic neutrals. It is a soft approach to Christmas with classical patterns and distressed finishes playing important roles.

Bring a touch of nature to your home this season.

Colors typically define the holiday season, but for 2009, "clear" products will have a definite impact. The lack of color will make a major statement. We may call them colorless, but in truth, they're "highly reflective."
